

Portable Tour Guide/Whisper System

The TGS Pro737 is a compact transportable solution with the ability for an interpreter to broadcast her voice by using the T32 compact battery-operated transmitter.

The TGS Pro737 is the easiest system to use and requires absolutely no training. The interpreter simply plugs in her microphone, turns on the transmitter and the system is ready to use.

The TGS Pro737 can be customized to accommodate eight (8) languages by simply adding one transmitter per language and upgrading to eight (8) channel receivers.

This system is easy to use and dollar for dollar the most cost effective system available anywhere.

Price \$1,840.00

TGS PRO-720 SYSTEM COMPONENTS
